Gerald Giles
Project Proposal
Low-level speed bumps for Eden Ave.
Select a Category
Sidewalks and Public Safety
Purpose
The speed limit on Eden Ave. between Payne Ave. and Moorpark Ave. is 25 mph. The SJ D.O.T. has confirmed that speeding does occur along this route. Installing low-level speed bumps would slow traffic without inflicting a bumpy ride to cars, especially smaller ones.
Location in District 1
Eden Ave. is within the city limits of San Jose
