Sidewalks and Public Safety

Purpose

Need additional street lights installed on telephone poles along Maplewood Ave. San Jose, 95117 where none exists as of present date 4/21/2019. Specific addresses for additional street lights are 341,351,391,429, and 485 Maplewood. To date, 4/21/2019, Maplewood Ave is unsafe to walk at night. The current telephone pole lighting system is inadequate for personal and public safety. Additional UPDATED LED lighting systems need to be installed on telephone poles located at the addresses mentioned above. I do not feel safe in my neighborhood at night with the current number of street lights that now exists.

Location in District 1

Additional LED street lights installed on telephone poles located at 341, 351, 391, 429 and 485 Maplewood Ave. San Jose, CA 95117.
